FDC3

What Is It?

- FDC3 is a standard for a suite of applications and a financial desktop to cooperate together.
- Users benefit from a more joined-up experience: applications contribute functionality to one another and share data between each other.
- This reduces the "friction" in getting common tasks done.

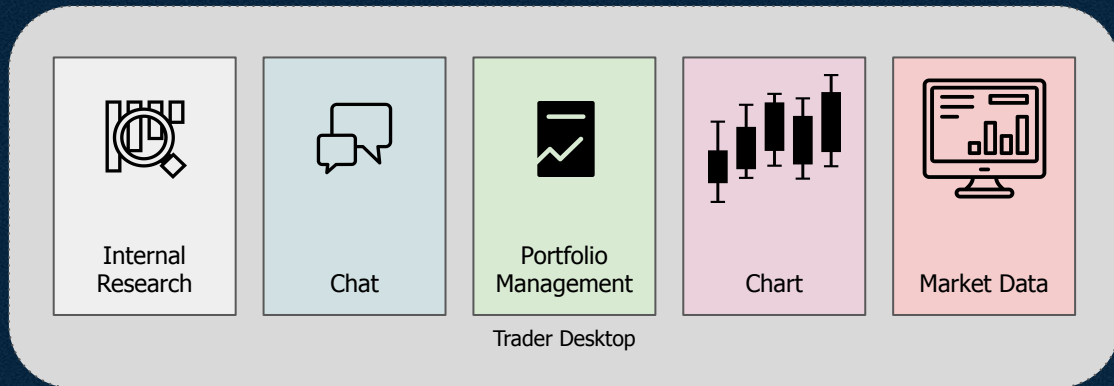

- Add to Reading List 
- Add Bookmark 
- Add to Favourites 
- Add to Quick Note 
- Find on Page 
- Add to Home Screen 

As a starting point, think of FDC³ as providing something like the "share" button on your phone

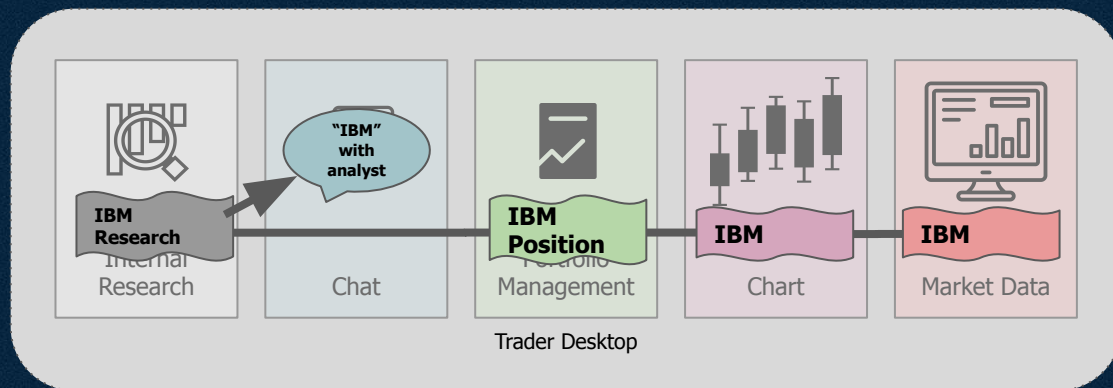

FDC3

What Is It? A Quick Example...

FDC3 is designed to allow a suite of applications written by different parties...

...to share contextual data via **broadcasting** and **raising intents** to each other.

What Is It? Benefits

Help Manage Information Overload

Finance is
information
dense.

FDC3 helps by
sharing a
"context"
between
applications.

Work Faster

By sharing
context,
applications
collectively
track the topic
the user is
focused on.

Keying errors
and copy-paste
are avoided.

Platform Agnostic

As an open
standard, FDC3
can be
implemented on
any platform and
in any language.

End the Integration Nightmare

Avoids the
one-to-one or
one-to-many
integration
projects that
plague IT
projects.

Open Standards Promote Innovation

By design, FDC3
is open to
extension.

An active
community
working on
growing and
improving the
standard.

How Can I Learn More? Training Courses

NEW

Introduction to FDC3 (LFEL1000)

Express Learning: 90 Minutes or Less

ENROLL TODAY

“You’ll learn about the FDC3 landscape, the underlying components of the Standard and how one can contribute to FDC3.”

Embeddable in your LMS!

FREE

NEW

Developing Solutions with FDC3 (LFD237)

ENROLL TODAY

“A tutorial-based training course in which you will build FDC3-enabled applications and become familiar with FDC3 concepts and APIs”

FINOS
MEMBER
BENEFIT

FDC3

How Can I Learn More? Practitioner Certification

FINOS Certified
FDC3 Practitioner
(FCFP)

COMING SOON!

“A certified FCFP will have demonstrated an ability to deploy FDC3 concepts into real-world use cases.”

“FCFP will demonstrate a candidate’s firm conceptual understanding of the key design considerations and rationale of the FDC3 standard and the limitations of FDC3 and where it is not relevant.”

Get Certified!

What's Happening: Working Groups You Can Join

Identity & Security Working Group

*Sharing context data
securely with peer
applications*

Context Data Working Group

*Working to standardize
different data types that
can be shared in FDC³*

Standards Working Group

*Moving the FDC3
standard along.*

FDC3 for the Web Working Group

*Implementing FDC³ to
work in regular browsers.*

What's Happening: Initiatives Being Developed in 2024

FDC³ Sail

*An Open Source FDC³
Desktop Agent
Implementation*

FDC³ Workbench

*Debugging and
exploration
application*

Bridging

*FDC³ support for multiple
languages and across
desktop agents.*

Desktop Agent Conformance

*Ensuring FDC³
implementations meet
the standard.*

FDC³ 2.1 and beyond

*New versions of
FDC³*

FDC³ Community

*Building a picture of
what's available in the
FDC³ ecosystem*
